Hi Kathleen-Thanks for your gracious consideration for a quick discussion while still on vacation! I wish to include Scott Sherlock, the Attorney-Advisor for our program office, to join the call as well. In an effort to find a mutually convenient time for all three of us, please advise what time/option would work for you. I can then send an invitation!

Look forward to....

Thanks.

Regards,

Jafrul Hasan, PhD, MPH, MS
Chief, Assessment Branch III

Kathleen,

A call makes sense to clarify what options there are. Thank you! The best EPA point of contact for the call is:

Jafrul Hasan, PhD, MPH, MS (Microbiologist)
Chief, Assessment Branch III
Risk Assessment Division/OPPT/EPA
1200 Pennsylvania Ave, NW (MC 7403M)
Washington, DC 20460
WJC East, Room 6334AA
Phone: Desk: 202-564-9686
Mobile: 202-577-9701
Fax: 202-564-7450

Others to include are: Oxendine.sharon@epa.gov, Sheehan.eileen@epa.gov, sherlock.scott@epa.gov,
thaler.elizabeth@epa.gov

Thank you,
Eileen Sheehan

Eileen

I did get your voice mail but I do not think you answered my question. Does EPA plan to post the unpublished study reports in the docket – or is EPA simply looking to have the reports available for staff's reference?

If we need to talk about this, I can try to arrange to call you later this week.

KATHLEEN M. ROBERTS

Hi Kathleen,
I tried to call you as it may be simpler to clarify over the phone. I can be reached at 415.972.3287.

As to the plans, we want to ensure that EPA's upcoming draft risk evaluation and future decisions are based on all available data. EPA wants to have the original information for any studies, published or unpublished, that are cited in our risk evaluation. As part of our TSCA work on N-methylpyrrolidone (NMP), EPA cited the unpublished reports in the problem formulation, and we want to be sure we have the underlying reports. As you know, the two unpublished reports are cited in various studies and reports including Annex XV Restriction Report Proposal for a Restriction (9 August 2013) and *Quantitative Risk Analysis for N-Methyl Pyrrolidone Using Physiologically Based Pharmacokinetic and Benchmark Dose Modeling* (Poet et al 2009) and others.

Does that help?

Please call at your convenience. I hope you received my voicemails; I have several different numbers for you?

Best,
Eileen Sheehan
Senior Policy Advisor
Existing Chemicals Branch, CCD, OPPT, OCSP

Eileen

What are the plans for these study reports? These were two very expensive studies sponsored by the NMP Producers Group and are quite valuable from a data compensation standpoint. As such, the members would not want the reports posted in an EPA docket in which it becomes publicly available to anyone.

Hi Kathleen,

I hope this finds you well! I work for EPA's TSCA program in the Existing Chemicals Branch. I believe we met previously in a meeting on NMP at EPA HQ a year or so ago. I am helping our Risk Assessment Division track down two 1999 unpublished studies on NMP. I would greatly appreciate your help and guidance as to how to track down the reports. I am happy to make calls, but I spoke with Doug Parsons and he thought it best to start with you. The two studies are:

- NMP Producers Group (1999b). N-Methylpyrrolidone (NMP): Two generation reproduction toxicity study in Wistar rats - Administration in the diet. Department of Toxicology of BASF Aktiengesellschaft, Ludwigshafen, Germany, Project No. 70R0056/97008, unpublished report.
- NMP Producers group (1999c). Two-generation reproduction toxicity study with N-Methylpyrrolidone (NMP) in Sprague-Dawley rats - Administration in the diet. Huntingdon Life Science, East Millestone, NJ, USA, project No.: 97-4106, unpublished report.

Again, I am happy to make calls to try to track down if you have suggestions as to where we might focus our efforts. Thank you in advance for any assistance you can provide! Don't hesitate to call me at 415.972.3287.

Best to you!

Eileen Sheehan

Senior Policy Advisor

EPA Region 9 Land Division on detail to OCSPP/OPPT/CCD/Existing Chemicals Branch
